25X1 1. [] Comment. The places mentioned are the locations of large Soviet supply installations.

25X1 2. [] Comment. These trains possibly carried troops.

25X1 3. [] Comment. Probably air force materiel.

25X1 4. [] Comment. So far as comparisons can be made with the traffic observed in the preceding month, it appears that military supply traffic decreased considerably. This is believed to be due to the fact that requirements for supply goods are relatively light during the period of basic training. After deducting 290 railroad cars which may have been used for the transportation of personnel, a total of 1,764 cars has been made available for the Soviets by the Berlin regional railroad headquarters in January. This represents only 45 percent of the number of cars requested by the Soviets in December, when Soviet loading operations were reported from 64 railroad stations of the Berlin district. However, the 48 railroad stations mentioned in the present report include all major stations, so the report furnishes a fairly accurate picture of Soviet supply shipments handled in January.

25X1 5. [] Comment. According to previous information, a component unit of the 3d Engr Regt of the Fourth Gds Mecz Army was entrained in Reeskow on 16 January 1953. [] Since according to the present report, this shipment was consigned to Unit [] known to exist in Eberswalde, the [] must belong to the 3d Engr Regt, which can therefore be considered as being confirmed until 16 January 1953. It was previously believed that the regiment [] which was once identified on a Soviet document found on 23 July 1949. []

25X1 6. [] Comment. The three trains mentioned carried units of the 31st AAA Div from Schoenwald to new stations.

25X1 7. [] Comment. Probably a troop train. []

25X1 8. [] Comment. [] confirms the 321th Gds RL Regt of the 4th Gds Mecz Army in Eberswalde until 7 January 1953. It is believed that the four flatcars with sideracks carried rocket launchers which had been repaired at the RL repair shop of the GCFG in Jueterbog.
